

#### Republic of the Philippines

### Office of the Solicitor General

134 Amorsolo St. Legaspi Village, Makati City

Technical Working Group for Information and Communications Technology

- Spen

#### TERMS OF REFERENCE

## Subscription of 24/7 Dedicated Colocation of Servers

#### Background:

The Office of the Solicitor General is enhancing its data center infrastructure. As the OSG's ICT infrastructure and systems continue to expand, there is a greater need for a robust and secure IT infrastructure to manage legal cases, process documents, and handle sensitive information. To ensure its IT systems' reliability, performance, and security, the Case Management Service has decided to undertake a colocation project.

#### Objective:

The Office of the Solicitor General's dedicated colocation of servers project aims to relocate its IT infrastructure to a specialized 24/7 data center facility. By collocating its servers, OSG aims to achieve enhanced performance, scalability, security, and cost optimization for its IT operations.

The project aims to provide OSG with a stable, reliable, and well-connected environment that supports its legal representation activities while minimizing downtime, ensuring data integrity, and enabling efficient resource allocation. Ultimately, the colocation project aims to strengthen OSG's IT infrastructure and support its mission of effectively representing the government before the courts.

#### Terms:

- 1. Scope. Supply and delivery of Subscription of 24/7 Dedicated Colocation of Servers
- 2. ABC. The Approved Budget for the Contract (ABC) is **Two Million Pesos** (**P2**,000,000.00) **for twelve** (12) **months**, inclusive of all government taxes, charges and other standard fees.

ICT SUBSCRIPTION			
ITEM	QTY	UNIT COST	TOTAL
Twelve (12) Months Subscription of 24/7	1	2,000,000.00	2,000,000.00

\_\_\_\_\_\_

Dedicated Colocation of		
Servers		
	TOTAL	₱ 2,000,000.00

3. Schedule of Payment. - To guarantee the performance by the winning bidder of its obligations under the contract, it shall post a performance security before the signing of the contract. The performance security shall be in an amount not less than the required percentage of the total contract price in any of the following forms and in accordance with the following schedule:

Form of Performance Security	Amount of Performance Security (Not less than the required % of the Total Contract Price)	Statement of Compliance
a) Cash or cashier's/ manager's check issued by a Universal of Commercial Bank	5º/u	
b) Bank draft/ guarantee or irrevocable letter of credit issued by a Universal or Commercial Bank; however, it shall be confirmed or authenticated by a Universal or Commercial Bank if issued by a foreign bank.		
c) Surety bond callable upon demand issued by a surety or insurance company duly certified by the Insurance Commission as authorized to issue such security.	30%	
TERMS OF PAYMENT		Statement of Compliance
Supplier agrees to be paid based on a prog follows:	ressive billing scheme as	
<ul> <li>Within thirty (30) days from coand issuance of the Inspection aby the OSG and submission of a documents - 95% of the contraction of the Contraction (1) year from the issuance Acceptance Report by the OSG price.</li> </ul>	and Acceptance Report all other required t price. of the Inspection and	

All bid prices shall be considered as fixed prices, and therefore not subject to price escalation during contract implementation.

4. Applicable provisions of the Government Procurement Reform Act (RA No. 9184) and its Revised Implementing Rules and Regulations (RIRR) shall form part of the Terms of Reference.

# **Technical Specifications:**

PARAMETERS	SPECIFICATIONS	COMPLIANCE
Full Rack Co-	- Provision of one (1) full rack to co-locate OSG's	
location	IT infrastructure.	
Power and	Provider shall:	
Cooling	a. Provision a 2 kVA power allocation for the	
	rack, ensuring a stable and uninterrupted	
	power supply.	
	b. Availability of redundant UPS systems	
	with a backup time of at least 15 minutes	
	to ensure continuous operation during	
	power outages.	
	c. Availability of cooling systems to maintain	
	a consistent temperature and controlled	
	humidity within the rack.	
Internet	Provider shall:	
Connectivity	a. Provision a leased line internet connection	
	with a minimum bandwidth of 50mbps.	
*	b. Multi-telco redundant internet	
	connectivity with a committed	
	information rate (CIR).	
	c. Unlimited usage with no data cap.	
	d. Symmetrical upload and download	
	speeds.	
	Ingress, logging, quarantine, testing,	
	mounting, connectivity, testing, and go-live	
Duningt	support.	
Project	- Oversight and project coordination,	
Management	including planning, implementation, and	
1	monitoring.	
, ,	Timely communication and reporting on  project progress and milestones.	
Facilities	<ul><li>project progress and milestones.</li><li>24x7 support for any facilities-related</li></ul>	
Support	issues, ensuring continuous operation of	
Support	the co-located infrastructure.	
\ \	- Availability of on-site technical personnel	
	to address facility-related concerns and	
	emergencies.	
Facilities	- 24x7 management of the co-location	
Management	facility, ensuring optimal conditions for	
6	the IT infrastructure.	
	- Regularly maintain infrastructure	
	components, including power, cooling,	
	and security systems.	
Network	- 24x7 technical support for network-related	
Support	issues, ensuring smooth connectivity and	
e e e	troubleshooting any network disruptions.	

Remote hands and eyes    - Availability of on-site technical staff to perform physical tasks, as directed by OSG, such as equipment installation, reboots, and visual inspections. power outages, ensuring continuous operations. 3. Computer Room Air-Conditioning (CRAC) System: Availability of redundant CRAC systems to maintain a consistent temperature and controlled humidity within the co-location facility. 4. Fire Suppression System: Provide a gas-based fire suppression system strategically located in ceilings and under floor voids to ensure equipment safety during fire outbreaks. 5. Building Security System: Implementation of a building security system, including access control systems with swipe cards and biometric authentication. • 24x7 monitoring of equipment rooms and personnel using the Building Management System group. Video surveillance cameras are located in strategic locations to ensure that the equipment areas, perimeter areas, and entrances are constantly monitored. This Terms of Reference serves as a guiding document for the Dedicated Co-Location of the Server's Project and should be referred to throughout the project lifecycle to ensure successful implementation and achievement of the project objectives.
